

WILKER FERREIRA AZIZ

April 26, 2018

Birth: 13/11/1985– São Paulo, SP – Brazil

Languages: Portuguese (native), English (fluent), Italian (intermediate), and French (basic)

Institute for Logic, Language and Computation

University of Amsterdam

Science Park 107, F2.11

Amsterdam, 1098 XG, Netherlands

Tel: +31 (0) 631991009

w.aziz@uva.nl

<https://wilkeraziz.github.io>

EDUCATION

- 2010–2014 **Ph.D. Computational Linguistics**
Research Institute in Information and Language Processing University of Wolverhampton
Thesis: Exact Sampling and Optimisation in Statistical Machine Translation
Supervisors: Prof. Dr. Lucia Specia (University of Sheffield)
Dr. Marc Dymetman (Xerox Research Centre in Europe)
Prof. Dr. Ruslan Mitkov (University of Wolverhampton)
Summary: I introduce an approach to exact optimisation and sampling based on a form of adaptive rejection sampling which addresses challenges in global optimisation and unbiased sampling in high-dimensional discrete spaces. In this view, an intractable goal distribution is upperbounded by a tractable proxy distribution which is then incrementally refined to be closer to the goal.
- 2005–2010 **B.Sc. Computer Engineering**
Escola de Engenharia de São Carlos - Universidade Estadual de São Paulo (USP)
Monograph: Lexical Substitution for Statistical Machine Translation
Summary: I propose a context model based on word co-occurrence and supervised learning to rank for cross-language lexical substitution.

EMPLOYMENT

- 01/2015–present **Research Associate, Institute for Logic, Language and Computation, Universiteit van Amsterdam, Netherlands**
Summary: I joined the Statistical Language Processing and Learning Lab led by Professor Khalil Sima'an in January 2015 where I work on several aspects of machine translation (e.g. word alignment, word reordering, and morphological analysis and generation) and paraphrasing employing log-linear, Bayesian, and deep generative models.
- 11/2013–12/2014 **Research Associate, Department of Computer Science, University of Sheffield, UK**
Summary: My work was funded by EPSRC under the MODIST (MOdelling DIscourse in Statistical Translation) project led by Prof. Dr. Lucia Specia. Discourse information typically requires nonlocal forms of parameterisation. I developed better decoding algorithms for SMT aiming at incorporating global features, particularly, I worked on a lazy incorporation of nonlocal parameterisation using a form of adaptive rejection sampling.
- 08/2013–12/2013 **Internship, Xerox Research Centre Europe (XRCE), Grenoble, France**
Summary: I worked with the Machine Learning for Document Access and Translation group under supervision of Dr. Marc Dymetman and Dr. Sriram Venkatapathy on developing an exact decoder/sampler for phrase-based SMT.
- 03/2009–02/2010 **Internship, Xerox Research Centre Europe (XRCE), Grenoble, France**
Summary: I worked with the Cross-Language Technologies group under supervision of Dr. Marc Dymetman and Dr. Lucia Specia on the use of context models and textual entailment to improve statistical machine translation coverage and quality.

RESEARCH INTERESTS

My work focusses on natural language processing applications (e.g. machine translation, parsing and paraphrasing) with a special focus on unsupervised learning of language structure. My research interests and experience span several disciplines including automata theory and formal grammars, machine learning, Bayesian statistics, deep generative models, and global optimisation.

TEACHING

I have extensive teaching experience on various topics:

- probabilistic graphical models and Bayesian methods for NLP
- approximate probabilistic inference: Markov chain Monte Carlo sampling and variational inference
- weighted automata and grammars, semirings, and deductive systems
- statistical and neural approaches to natural language processing

Since 2015, I coordinate, design, and implement MSc and BSc courses offered at UvA.

Course	<i>Unsupervised Language Learning</i>
Role	Coordinator (2018) offered in collaboration with Ekaterina Shutova (ILLC)
Programme	Master's of AI (UvA)
URL	https://uva-slp1.github.io/ull/
Description	The course covers advanced unsupervised learning techniques in natural language processing with a focus on meaning representation (including deep generative models of word and sentence representation).

Course	<i>Natural Language Processing 2</i>
Role	Main lecturer (2015-2017), lecturer (2018)
Programme	Master's of AI (UvA)
URL	https://uva-slp1.github.io/nlp2/
Description	The course covers structure prediction problems related to translation (e.g. unsupervised alignment, synchronous grammar induction, statistical and neural MT).

Course	<i>Natural Language Models and Interfaces</i>
Role	Coordinator (2018)
Programme	Bachelor's of AI (UvA)
URL	https://uva-slp1.github.io/nlmi/
Description	The course covers some of the essential techniques in natural language processing with a focus on language modelling and word representation.

For a complete list of courses and projects including available material and project outcomes, please refer to <https://wilkeraziz.github.io/teaching.html>. For invited lectures and talks, please refer to <https://wilkeraziz.github.io/talks.html>.

I have recently developed a tutorial on variational inference and deep generative models for NLP audiences. This is a joint effort with Philip Schulz, and we have been taking this tutorial (or parts of it) to diverse audiences at universities (e.g. Melbourne, Monash, Macquarie, and Amsterdam) and companies (e.g. Amazon, Naver Labs). I am happy to announce that the tutorial has been selected for presentation at ACL 2018 in Melbourne. For more information check our schedule and available resources: <http://wilkeraziz.github.io/vitutorial>.

SUPERVISION

I have extensive experience supervising students at all levels.

ONGOING		ROLE
PHD	Joost Bastings (2017–present; UvA)	co-promotor
THESIS	<i>Incorporating Linguistic Structure in Neural Machine Translation</i>	
PHD	Philip Schulz (2015–2018; UvA)	co-promotor
THESIS	<i>Latent Variable Models for Machine Translation and How to Learn Them</i>	
MSC	Bryan Eikema (2017–present; UvA)	supervisor
THESIS	<i>Semi-Supervised Learning for Neural Machine Translation</i>	
MSC	Nuno Mota (2017–present; UvA)	supervisor
THESIS	<i>Deep Kernel Learning and Gaussian Processes for Text Classification</i>	
MSC	Tom Pelsmaecker (2018–present; UvA)	supervisor
THESIS	<i>Bayesian Neural Language Models</i>	
MSC	Daan van Stigt (2018–present; UvA)	supervisor
THESIS	<i>Semi-Supervised Learning of Recurrent Neural Network Grammars</i>	

COMPLETE		ROLE
PHD	Joachim Daiber (2016–2018; UvA)	co-promotor
THESIS	<i>Typologically Robust Statistical Machine Translation</i>	
PHD	Miloš Stanojević (2015–2017; UvA)	co-promotor
THESIS	<i>Permutation Forests for Modeling Word Order in Machine Translation</i>	
MSC	Sanders Bijl de Vroe (2017; UU)	supervisor
THESIS	<i>Character-level Neural Architectures for Jointly Predicting Word Alignments and Word-internal Structure in Morphologically Complex Languages</i>	
BSC	Guido Linders (2016; UvA)	supervisor
THESIS	<i>Feature-Rich Unsupervised Word Alignment Models</i>	
BSC	Iason Sebastiaan de Bondt (2015; UvA)	supervisor
THESIS	<i>Sampling from Probabilistic Context-Free Grammars</i>	

For more information and links to theses, please refer to <https://wilkeraziz.github.io/people.html>.

SERVICES

I often serve on the program committee of ML/CL/NLP/MT conferences:

- CL/NLP conferences: ACL, EMNLP, NAACL, Coling, IJCNLP, CoNLL
- ML conferences: NIPS, ICML, ICLR
- MT conferences: WMT, EAMT, AMTA, MT Summit

and I review for CL/NLP/MT journals: Natural Language Engineering, Computer Speech and Language, and Machine Translation.

PUBLICATIONS

Selected publications representative of my current interests

[1] *A Stochastic Decoder for Neural Machine Translation*

[2] *Deep Generative Model for Joint Alignment and Word Representation*
<https://arxiv.org/pdf/1802.05883.pdf>

[3] *Graph convolutional encoders for syntax-aware neural machine translation.*
<http://www.aclweb.org/anthology/D/D17/D17-1209.pdf>

[4] *Fast collocation-based Bayesian HMM word alignment*
<http://www.aclweb.org/anthology/C/C16/C16-1296.pdf>

PATENTS

U.S. Patent Application Filing: SAMPLING AND OPTIMIZATION IN PHRASED-BASED MACHINE TRANSLATION USING AN ENRICHED LANGUAGE MODEL REPRESENTATION

Inventor(s): Marc Dymetman; Wilker Aziz; Sriram Venkatapathy

U.S. Ser. No.: 13/750,338

Filed on: 01/25/2013

U.S. Patent Application Filing: DYNAMIC BI-PHRASES FOR STATISTICAL MACHINE TRANSLATION

Inventor(s): Marc Dymetman; Wilker Aziz; Nicola Cancedda; Jean-Marc Coursimault; Vassilina Nikoulina; Lucia Specia.

U.S. Ser. No.: 12/780,040

Filed on: 05/20/2010
